BASE STATION

THE RV THAT KEEPS PACE WITH YOUR IMAGINATION

The exciting new Base Station is designed for the fun seeker with a drive to explore.

The Base Station offers the best of both worlds ... all worlds. Featuring the trademark comforts of all Jayco RVs, the Base Station boasts a storage area (just under 11 cubic metres) where you can pack the 'essentials' vital to expanding your holiday experience.

Take your dirt bikes, mountain bikes, go karts, surf boards, jet skis ... the possibilities are endless.

The larger Base Station model will even fit your Harley!

Think about it. Bed up front, garage in the back - the road of dreams on your horizon.

Forget limits! It's your holiday and your dream. The RV that keeps pace with your imagination.

BASE STATION

IT'S ALL ABOUT ADVENTURE

The Base Station's unique design means it can sleep up to eight people. Up front is the caravan compartment which sleeps two, with a fold out double bed extending outside the vehicle's super-structure. Add an optional converter and the dinette provides two additional sleeping berths, while inside the garage compartment there are also two fold down single beds with the option of double bunks to each side.

At the rear, a sturdy fold-down back door & comprising the entire back of the vehicle & doubles as a ramp, so equipment and machines can be stored inside. Two cables allow the ramp to be turned into a deck. There is also a handy built-in mechanic's rack in the rear compartment. An internal doorway links both compartments.

A toilet and shower are standard, making the Base Station completely self-sufficient.

INTERNAL FEATURES

- > Mechanics Rack
- > Fold Down Bunk Bed in garage area
- > Microwave
- > 12v rangehood
- > Dometic RM2553
- > SMEV 4 burner gas grill with one 240v element, 12v ignition and flame failure device

- > Outback pack (20' unit only)
- > ALKO drop jacks
- > Bed End Bag Fly (three sided)
- > 100 Amp Auxiliary battery
- > Bed converter for dinette
- > Wind up TV antenna
- > External Speakers

SUPERIOR DESIGN & CONSTRUCTION

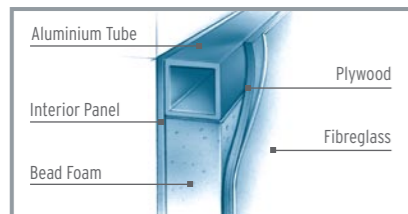

Our innovative design, leading-edge construction techniques and outstanding components ensure that your Jayco Base Station is reliable, functional and looks great for many years of holidaying pleasure.

MILLENNIUM CHASSIS

Independent testers describe it as the clever chassis ...

- > Superior strength and protection.
- > PSC members that support the floor are superior when bending and compression than box section steel.
- > The design enables the chassis to be light but still achieve maximum strength.
- > All chassis are galvanized for long life.
- > Pressed holes offer protection for under floor wiring and plumbing.

JAYCO TOUGH FRAME

- > Latest revolution in RV construction.
- > 19mm x 19mm tubular aluminium outer frame.
- > 4 vacuum-bonded layers comprising fibreglass, ply and polystyrene foam.
- > Superior insulation and dent resistant.
- > Incorporates galvanized plating to support the internal furniture fittings.
- > Outer fibreglass skin is 150% thicker than standard aluminium with high gloss gel-coat finish.

QUALITY FURNITURE

- > Exclusive timber furniture styling, the latest in design.
- > Aluminium framing in all high-use areas such as the dinette, lounge and beds.
- > Lightweight cabinet fronts are securely screwed - not stapled - to provide additional strength.
- > Positive cupboard catches to ensure your valuables travel securely.
- > New curved corner extrusion - adds strength and style.
- > Orthopedic slats form an important part of our double and single beds.
- > Beds lift up easily with the assistance of gas struts to provide ready access to large storage areas.
- > Double beds extend by an additional 150mm.

RELIABLE POWER

The Setec power converter is Australian-designed and constructed for our sometimes inconsistent supply of power in remote areas. This built-in fused power converter provides a safe 12v supply from 240v mains. Produced especially for Jayco, the Setec system delivers generous lighting on either 240v or 12v supply.

When only 12v power is available, the unit is self-sensing and no switching is required. A valuable additional feature of the unit is its built-in trickle charger (13.5v output) to cater for an auxiliary battery.

DESIGNER UPHOLSTERY

- > Completely redesigned for 2009 by one of Australia's leading upholstery firms.
- > Extensive selection of fabrics to choose from.
- > All cushions use Enduro™ foam, Australia's most recognized high-resilience foam, providing years of comfort and support.
- > Enduro™ foam is fire retardant.
- > All Jayco upholstery feature Ultra-Fresh antimicrobial protection, inhibiting growth of mould, mildew and fungi and low in dust mite allergen - assisting in the prevention of allergies, respiratory tract disorders and asthma.
