JAYCO TOY HAULER TYRES ARE FILLED WITH NITROGEN

Jayco has implemented a state of the art Nitrogen-based pressurisation system for its entire range of RV's.

Nitrogen offers the following benefits over oxygen:

- Fuel savings of up to 3%
- 25% in reduction of tyre wear
- 27% reduction on tyre blowouts
- Eliminates interior wheel corrosion
- Improved handling and safety

SUPERIOR DESIGN & CONSTRUCTION JAYCO TOUGH FRAME

Jayco's tough frame consists five major ingredients which - when vacuum bonded - makes it superior in strength and detail by comparison to the conventional 'stick & tin' aluminium cladded caravans on the market.

- 01. Jayco Tough Frame**
Incorporates galvanised plating to support the internal furniture fittings
- 02. Internal Wall Ply**
CE coated for durability
- 03. Polystyrene Foam**
Superior Insulation
- 04. Aluminium Outer Frame**
19mm x 19mm welded tubular frame - strong but light
- 05. 3mm Ply**
For added strength
- 06. Fibre Glass**
150% thicker than aluminium, dent resistant with a high gloss finish

RELIABLE POWER

The Setec power converter is Australian-designed and constructed for our country's occasionally inconsistent supply of power in remote areas. This built-in fused power converter provides a safe 12v supply from 240v mains. Produced specifically for Jayco, the Setec system delivers generous lighting on either 240v or 12v supply. When only 12v power is available, the unit is self-sensing and no switching is required. A valuable additional feature of the unit is its built-in trickle charger (13.5v output) to cater for an auxiliary battery.

ENDURANCE CHASSIS

Independent testers describe it as the clever chassis...

- Superior strength and protection.
- PSC members, that support the floor, are superior to box section steel in terms of bending and compression.
- The design enables the chassis to be light but still achieve maximum strength.
- All chassis are galvanized for long life.
- Pressed holes offer protection for under floor wiring and plumbing.
